

MOHAMED ATEF

Regional Project and Portfolio Management Leader | PMO Design and Governance | Digital Transformation Delivery

Cairo, Egypt | +20 109 419 9163 | moh.atef116@gmail.com

[linkedin.com/in/mohatef116](https://www.linkedin.com/in/mohatef116) | matef116.github.io/Portfolio

PROFESSIONAL SUMMARY

Regional project and portfolio leader with close to six years of delivery across Egypt, Saudi Arabia, and Jordan, covering donor-funded employment programs, enterprise software, e-learning, and corporate training. Currently leads a PMO of six project managers running more than twelve concurrent projects for GIZ, ILO, UNICEF, Plan International, CRS and CFYE, reporting to the Chief Operating Officer and presenting portfolio performance into CEO level reviews. Has built two PMOs from scratch and moved both delivery functions off manual tracking onto automated work management systems. Started as an instrumentation and control engineer in a high-hazard petrochemical plant, which set a data-first habit of root cause analysis and evidence-based escalation. Sustains around 65% gross profit at portfolio level, delivers close to 90% of projects within approved budget.

CORE COMPETENCIES

Portfolio and Program: Portfolio Management, Program Management, PMO Design and Setup, Governance Frameworks, Portfolio Reporting, Resource and Capacity Planning, Prioritisation, Benefits Realisation

Delivery and Control: Project Planning and Scheduling, Scope and Change Control, Cost Variance Control, Gross Profit and P&L Ownership, DSO and Cash Collection, Risk and Issue Management, Quality Assurance, Donor Audit and Compliance

Digital Transformation: Work Management System Implementation, Process Automation, Business Process Reengineering, Change Management, Software Delivery Lifecycle, Product Ownership, Requirements and User Acceptance Testing, Data Systems and Reporting Automation

Leadership: Team Leadership, Line Management of Project Managers, Competency Frameworks, Coaching and Performance Management, Executive Stakeholder Management, Client and Donor Negotiation, Vendor and Subcontractor Management, Contract Drafting and Commercial Terms

Delivery Domains: Employment and Workforce Development, Software and Web Platforms, E-Learning and Instructional Design, Corporate Training and Capability Building, Automation and Business Systems

Standards and Methods: PMBOK 7, PMI Talent Triangle v2, PMI Software Extension, Disciplined Agile, ISO 9001, ISO/IEC 25010, ADDIE, RACI, RAG Reporting, Root Cause Analysis

PROFESSIONAL EXPERIENCE

Basharsoft Corporation (iCareer)

Regional Project Management Team Lead | Cairo, Egypt (Egypt, Saudi Arabia, Jordan) | October 2025 to Present

- Lead a regional PMO of six project managers delivering more than twelve concurrent projects across three countries, with a peak load of thirteen active projects for international donors, government entities and corporate clients.
- Report directly to the Chief Operating Officer and own the weekly executive reporting line into CEO and COO portfolio reviews, using a one page report per project and a consolidated portfolio snapshot.
- Built the department operating system inside three months: tiered governance differentiated by project manager maturity, a weekly RAG status tracker with defined escalation rules, a consolidated multi-project budget workbook, and standard document templates.
- Own portfolio key results across revenue, on-time delivery, days sales outstanding, cost variance and gross profit, holding portfolio gross profit at around 65 percent and on-budget delivery near 90 percent.
- Passed UNICEF, Challenge Fund for Youth Employment and Plan International audits with no findings, and led donor reporting, closure documentation and beneficiary data integrity across the portfolio.
- **Digital transformation.** Directed the Grievance Management System for the International Labour Organization and the Social Security Corporation in Jordan, converting a paper-based grievance process into a digital platform built on ASP.NET Core, React, and MSSQL, with a five-role anonymous workflow and HR system integration, covering vendor contracting, scope definition, security and penetration review, user acceptance testing, and go-live certification.
- **Work management and adoption.** Led the enterprise rollout of ClickUp as the single source of delivery truth, including the operating manual, a multi-part training series, a challenge-based certification for four squads, and the change management communication plan.
- **Automation.** Standardised recurring PMO work into reusable procedures, including a 17-step employability data audit protocol, a tokenised consultancy contract generator, and script-based tools that removed manual spreadsheet handling from donor reporting.

- **Commercial judgement.** Recalibrated the eligible beneficiary denominator on a Plan International employment program after analysis showed the target base was overstated, then restarted delivery on corrected numbers; separately called a controlled exit on a blocked Saudi engagement, closing it at breakeven rather than letting cost run.
- Built the hiring and development system for the team: a case study assessment with a seven dimension weighted rubric for senior project manager candidates, competency to key result mapping aligned to PMBOK 7 and the PMI Talent Triangle v2, and a 30 day technical curriculum for project managers working on software.
- Coached between three and six team members who were promoted or grew into project manager roles, and defined the role boundaries between project management, project coordination, operations and learning and development.
- Designed implementation models, delivery funnels and unit economics for competitive donor bids, including a UNICEF and Abdullah Al Ghurair Foundation youth employment program covering digital economy, creative industries, green economy, entrepreneurship and technical and vocational education pathways.

Elham Knowledge Company

Head of Project Management and Customer Success | Riyadh, Saudi Arabia | January 2022 to October 2025

- Reported to the Chief Executive Officer and built the project management function from zero, writing the policies, procedures, delivery workflow, contract templates, tracking system and approved vendor list that the company still runs on.
- Led a team of five across instructional design, customer success and software operations, serving business to business and business to government clients across the Gulf.
- Ran seven concurrent client engagements in e-learning, motion graphics and video production, alongside a virtual reality build, an internship management product and a learning management system course collection platform.
- Managed a twenty client software as a service learning management system account book, covering onboarding, adoption, renewal and escalation.
- **Digital transformation.** Replaced the manual help desk and customer support process with an automated ClickUp workflow, giving the company routed intake, service level visibility and reportable resolution times for the first time.
- **Delivery outside existing capability.** Took on a virtual reality training game for Saudi Aramco when the company had no game development team, rewrote the game design document, sourced and contracted a specialist developer, enforced hard weekly progress gates, and wrote the contract protections that covered late change requests and missing approvals.
- Negotiated scope, pricing, and commercial terms directly with government and enterprise clients, and managed vendor selection and subcontractor performance across media, software, and training suppliers.

Egyptian Hydrocarbon Corporation (EHC)

Instrumentation and Control Engineer | Egypt | December 2020 to January 2022

- Worked on field instrumentation and control systems in a continuously operating petrochemical plant, a high-hazard environment where an error carries safety and production consequences.
- Investigated plant trips and full shutdown events, reconstructing the event chain by cross-checking sensor, instrument, and actuator readings against each other and running cause-and-effect studies to isolate the initiating device.
- Carried out calibration, loop checking, preventive maintenance and fault diagnosis on control instrumentation, working to documented safety procedures and permit systems.
- Built the analytical habits now applied to portfolio work: weighting data accuracy by source, testing alternatives before committing, and separating symptom from cause before acting.

SELECTED PROGRAMS AND SYSTEMS DELIVERED

- **Grievance Management System, International Labour Organization and Social Security Corporation (Jordan).** Conversion of a paper-based grievance process into a digital platform with an anonymous five-role workflow and HR system integration, delivered on ASP.NET Core, React and MSSQL under a staged payment and go-live certification model.
- **Virtual reality training, Saudi Aramco.** Immersive training product delivered through a sourced specialist team with weekly delivery gates and contractual change control, built with no in-house game development capability.
- **Software as a service learning platforms, Elham (Saudi Arabia).** Internship management software, a learning management system course collection platform, and a twenty-client SaaS learning management system portfolio.
- **Challenge Fund for Youth Employment (Egypt).** 20,000+ trained and 12,000+ placed, with a 46% female participation rate.
- **GIZ portfolio (Egypt).** Parallel streams covering employment for persons with disabilities, a technology university partnership with Raya, blue-collar hiring, and multi-quarter beneficiary data audits.
- **Corporate employment programs.** Coca-Cola Foundation training program for 30,000 participants and a national job fair delivered with Life Makers.

- **Arweqa (Saudi Arabia).** Unemployment-to-employment program; diagnosed a blocking dependency on a shared client call centre account, presented two structured options with a defined exit trigger, and closed at break-even when the client would not resolve it.
- **Digital Egypt Pioneers Initiative, Ministry of Communications and Information Technology.** Five cohorts of 1,200 trainees in professional and soft skills, inside the national digital transformation program.

CLIENTS AND DONORS

International donors and development partners: GIZ, International Labour Organization (ILO), UNICEF, Plan International, Catholic Relief Services (CRS), Challenge Fund for Youth Employment (CFYE), Abdullah Al Ghurair Foundation

Government and public sector: Ministry of Communications and Information Technology (Egypt), Social Security Corporation (Jordan), Zakat, Tax and Customs Authority (ZATCA), Saudi Tourism Authority, Ministry of Hajj and Umrah, Ministry of Investment (MISA), Saudi Commission for Health Specialties (SCFHS), King Salman Global Academy for Arabic Language, Arweqa

Corporate and foundation: Saudi Aramco, Coca-Cola Foundation, Misk Foundation, KAPSARC, Raya, Mwan, Hrakat, Mohreky, Life Makers

TRAINING AND FACILITATION

- Delivering professional and soft skills programs, with material designed in-house using the ADDIE model.
- Training organisations and programs: Digital Egypt Pioneers Initiative (MCIT), Nahdet Misr, Plantre, Junction, and Ideas Gym robotics for ages seven to forty.
- Internal capability building at employer level: ClickUp adoption series, a technical curriculum for project managers, and facilitator guides and reflection tools built for each session.

EDUCATION

Bachelor of Science in Electronics Engineering, Control and Industrial Electronics

Faculty of Electronics Engineering, Menoufia University, Egypt, 2019

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Certified Trainer, licensed by the Ministry of Planning and Economic Development, Egypt.
- Google Project Management Professional Certificate: PMI-aligned curriculum covering more than 100 hours of formal project management education, above the 35 contact hours PMI requires for PMP eligibility.
- Finance for Non-Financials, School of Executive Education, Eslsca University, 2026: financial and cost accounting, the three core statements, revenue recognition, cash flow, assets and liabilities, and financial ratio analysis.

TECHNICAL SKILLS

Programs and portfolio management: ClickUp (administration, rollout and automation), Asana, Jira, Monday, Trello, Microsoft Project concepts, Google Workspace, Microsoft Office, portfolio dashboards and RAG trackers

Data and reporting: Advanced Excel modelling, Google Sheets automation, Google Apps Script, Python for spreadsheet automation, KoboToolbox, KPI and budget workbook design, beneficiary data auditing

Software delivery: Requirements definition and product ownership, ASP.NET Core, React and MSSQL delivery oversight, user acceptance testing, quality assurance, security and penetration review, deployment and go live governance

Learning technology: Learning management systems (LMS), e-learning authoring tools, virtual reality (VR) training production, ADDIE

Engineering: Electrical and electronics engineering, instrumentation and control systems, calibration and loop checking, cause and effect analysis of trip events; industry exposure across energy, manufacturing, petrochemicals, and oil and gas

LANGUAGES

Arabic: native.

English: full professional proficiency.
